

# AI Literacy Skills 101 Course

A shared toolkit for K-12 teachers and students to explore, understand, and use AI responsibly and ethically.

Every student will graduate into an AI world. This course equips them to navigate it with confidence, curiosity, and care, and gives teachers a clear, responsible way to bring AI into everyday learning.

- Grounded in the OECD, European Commission, and Code.org AI Literacy Frameworks
- 8 short lessons (about 40 minutes each) aligned to seven core AI literacy skills
- Downloadable classroom activities, posters, and teacher guides
- Hands-on practice with real-world examples and reflection tools

## Core AI Literacy Skills

Critical Thinking with AI

Creativity with AI

Computational Thinking

Collaboration with AI

Self and Social Awareness with AI

Problem Solving with AI

Communicating AI Use

"For K-12 teachers and students trying to wrap their brains around AI and be responsible, the Toddle AI Literacy course is a wonderful primer. The videos are short and relevant. The activities get you practical experience right away. In just an hour, you'll have some critical understandings to better navigate today's AI landscape."

**Matt Miller**, keynote speaker and author of *Ditch That Textbook*
